“HANDLE has taught me techniques that are simple yet inexpensive, and do improve muscle tone, vestibular processing, kinesthesia, proprioception, and tactility...I have seen dramatic and drastic changes in the clients with whom I incorporate HANDLE activities.”
—Gail Buchen, PT

HELP US SPREAD THE WORD!

What
others
say

“I went to one of HANDLE’s seminars to help me with the students I work with, and little did I know, it would be a life changing experience for me. Judith helped me overcome years of frustration with a few simple exercises. I no longer feel like a klutz... Even my eye doctor was amazed... He said, ‘You have depth perception now! What have you done?’”

— D. Christensen
Teacher Assistant for Special Needs Children

“In her presentations Judith Bluestone combines an insightful background in neurophysiology with practical activities for children and adults with a spectrum of learning and neurological challenges. HANDLE ingeniously addresses the underlying causes of these challenges. I fully support HANDLE’s path to healing through gentle enhancement; it complements Waldorf special education in a wonderful way.”

— Ingun Schneider, RPT, Director of Remedial Education
Rudolf Steiner College, Fair Oaks, CA

“The HANDLE Institute trainings are truly the cutting edge! It gave meaning to many behaviors that I see everyday but just didn't know how to interpret. My understanding and interventions are forever changed. These trainings should be required for any mental health professional who works with ADHD, Tourette's Syndrome, Asperger's and learning problems.”

—Mark Lanci, MSW, LCSW

“I took the introductory training in Iowa in August. Since then I have been doing the exercises with my students in a challenging-behaviors classroom in Vermont. I have seen positive results overall & have generally been fascinated by the whole process... I really think HANDLE is valuable and I'd like to see it utilized in schools, nursing homes, etc.”

— Laura Bryant, Educator
