

# Frustrated by a loved one's social or academic behaviors?

The HANDLE Institute offers screenings as well as complete evaluations that look beneath the surface and discover underlying causes of worrisome behaviors and specific challenges.

Individuals 5 years old and older with suspected or diagnosed learning disabilities, attentional disorders, problems of organization, and other mild-to-moderate behavior challenges can benefit from a HANDLE Screening.

*A limited number of reduced cost screening sessions will be available in Seattle*

*on Tuesday, Wednesday, and Thursday, July 22, 23 & 24, 2008.*

Screenings will be held at The HANDLE Institute International, LLC, 1300 Dexter Avenue North, Seattle. Screening on these dates will be performed by health and human service professionals enrolled in the HANDLE® Intermediate Course. All screening sessions will be supervised by a Certified HANDLE Screener, Certified HANDLE Practitioner, or Advanced Intern. Fee for each screening session is \$90 (special rate of only \$75 if booked by July 3<sup>rd</sup>!). The sessions include presentation of results, an abbreviated HANDLE program of activities, plus recommendations for complementary therapies.

HANDLE incorporates many different disciplines and provides families, caregivers, educators, and therapists a non-drug solution to many perplexing situations. HANDLE has helped families across the nation and around the world to achieve significant results, for children and adults alike. Call us at 206-204-6000 or visit us on the web at [www.handle.org](http://www.handle.org) for more information.

*"HANDLE was able to fill in the missing pieces. We finally understand what's going on."*
